02 Who We Are

Lighting Specialists
Customization

Lu•mi

/Lōomə/

Derived from the latin word lūmen meaning "light of life".

Lumidesign is a lighting company specializing in lighted mirrors and mirror TVs. The company was established in 2009 with headquarters in Richmond Hill.

Since our inception, Lumidesign has been serving interior designers and architects equipping them with lighting solutions making them more successful. The company focuses on high quality, detailed design, short lead and intelligent customization setting it apart from the competition.

We realize that it's hard to find a one stop shop that has design and manufacturing all in one place. Lumidesign is Canada's only manufacturer and back-lit specialist with over 10 years of industry experience. All products are designed, manufactured and assembled in Canada.

We pride ourselves on executing custom, detailed designs of the highest quality that meets all the specific parameters of our clients.

BACK-LIT MIRROR

CAROL

The Carol back-lit mirror highlights the vanity and fine details on walls as well as backsplashes. Its playful, semi-rounded corners have a retro yet luxury appeal. The LEDs themselves are not encased, therefore allowing the light to bounce around the room highlighting various textures and surfaces.

09

01

Open Chassis Design

Light from the hard strips radiate outwards from the back of the mirror towards the entire space providing atmospheric lighting.

02

Light Technology

Lighting composed of very high quality LED hard strips that are embedded directly to the surface of the mirror.

03

Finishes

The back-lit mirror itself is enclosed within a sleek and scratch resistant finish, matte white steel chassis.

BACK-LIT MIRROR

SARAH

Our original model , the Sarah back-lit mirror stands the test of time with its clean design and sleek demeanor. Our classic lighted panels along the top and bottom of the mirror casts a radiant glow that accentuates both vanity and wall details.

01

Open Chassis Design

Light from the hard strips radiate outwards from the back of the mirror towards the entire space providing atmospheric lighting.

02

Light Technology

Lighting composed of very high quality LED hard strips that are embedded directly to the surface of the mirror.

03

Finishes

The back-lit mirror itself is enclosed within a sleek and scratch resistant finish, matte white steel chassis.

BACK-LIT MIRROR

CLARA

The Clara back-lit mirror features perimeter lighting. All edges are frosted in our signature process, resulting in bold lighting that encompasses the entire fixture. This creates even room lighting, whether on its own or paired with existing lights.

01

Open Chassis Design

Light from the hard strips radiate outwards from the back of the mirror towards the entire space providing atmospheric lighting.

02

Light Technology

Lighting composed of very high quality LED hard strips that are embedded directly to the surface of the mirror.

03

Finishes

The back-lit mirror itself is enclosed within a sleek and scratch resistant finish, matte white steel chassis.

CORE

BACK-LIT MIRROR

LUCY

Distinctively circular, the Lucy back-lit mirror creates the perfect balance of ambient lighting and softness. It brings an understated gesture of grandeur with its sweeping shape, while still remaining ultra modern. The open housing design allows the mirror to cast a smooth, atmospheric glow along the walls.

15

01

Open Chassis Design

Light from the hard strips radiate outwards from the back of the mirror towards the entire space providing atmospheric lighting.

02

Light Technology

Lighting composed of very high quality LED HO Flex Technology strip that is embedded directly on the actual surface of the mirror.

03

Finishes

The back-lit mirror itself is enclosed within a sleek and scratch resistant finish, matte white steel chassis.

BACK-LIT MIRROR

KELLY

The Kelly backlit mirror is a timeless design. It lights larger bathrooms with ease, because its lamps are not encased, thus casting a perfect wall glow along with even and forward lighting. It is a truly classic piece that will brighten up any space.

01

Open Chassis Design

Light from the hard strips radiate outwards from the back of the mirror towards the entire space providing atmospheric lighting.

02

Light Technology

Lighting composed of very high quality LED hard strips that are embedded directly to the surface of the mirror.

03

Finishes

The back-lit mirror itself is enclosed within a sleek and scratch resistant finish, matte white steel chassis.

BACK-LIT MIRROR

SOHO

Inspired by the lofts and galleries of the iconic lower Manhattan district the Soho backlit mirror is our classic oblique glass, inset in a tapered metal disk. This not only creates a sculptural showpiece, but it also allows for the light in the mirror to dually project forward to the viewer and spread out towards the walls at the same time.

01

Design

Light from the hard strips radiate outwards from the back of the mirror towards the entire space providing atmospheric lighting.

02

Light Technology

Lighting composed of very high quality LED HO Flex Technology strip that is embedded directly on the actual surface of the mirror.

03

Finishes

The back-lit mirror itself is enclosed within a sleek and scratch resistant finish, matte white steel chassis.

CORE

BACK-LIT MIRROR

MICHELLE

Taking cues from classic vanity mirrors, the Michelle back-lit mirror modernizes that simple oval shape. What results is a mature piece that softly illuminates the entire powder room.

21

01

Open Chassis Design

Light from the hard strips radiate outwards from the back of the mirror towards the entire space providing atmospheric lighting.

02

Light Technology

Lighting composed of very high quality LED HO Flex Technology strip that is embedded directly on the actual surface of the mirror.

03

Finishes

The back-lit mirror itself is enclosed within a sleek and scratch resistant finish, matte white steel chassis.

FRONT-LIT MIRROR

ALPHA

The Alpha front-lit mirror is ceiling mounted to fit in any modern room or space. The premium matte white finish that encloses the mirror, adds a level of dimension in addition to its clean and minimalist look. An image or work of art can also be mounted on the backside of the mirror, further complementing its unique design.

01

Closed Chassis Design

Allows light to come forward towards the face, reducing overhead shadows that are typically cast from pot lights.

02

Light Technology

Lighting composed of very high quality LED hard strips that are embedded directly to the surface of the mirror.

03

Finishes

The front-lit mirror itself is enclosed within a sleek and scratch resistant finish, matte white steel chassis.

CORE

FRONT-LIT MIRROR

AMBER

The Amber front-lit mirror offers a combination of radiance and focus. It illuminates bathrooms with a relaxed, ambient glow while providing vanity lighting for makeup or grooming. The 2" vertical frosting allows the light to come forward directly reaching the face, cutting through any overhead shadows that typically exist from pot lights.

25

01

Closed Chassis Design

Allows light to come forward towards the face, reducing overhead shadows that are typically cast from pot lights.

02

Light Technology

Lighting composed of very high quality LED hard strips that are embedded directly to the surface of the mirror.

03

Finishes

The front-lit mirror itself is enclosed within a sleek and scratch resistant finish, matte white steel chassis.

FRONT-LIT MIRROR

SIGMA

The Sigma front-lit mirror is a sleek, circular ceiling mounted floating fixture, that is an exquisite piece to complete any bathroom space. The mirror is entirely enclosed and features a circular, forward lighting with a premium finish. This item can also be customized in various ways with endless options for special finishes and colours.

01
2" Perimeter Frosting
Allows light to come forward towards the face, reducing overhead shadows that are typically cast from pot lights.

02
Light Technology
The lighting is composed of a very high quality LED Panel strip that is embedded right onto the surface of the mirror.

03
Finishes
Colour choices include a Matte White Body, Chrome Mirror Finish, Satin Brass, as well as a custom colour

BETA CEILING

Take the Beta to new heights with our limited edition ceiling-mounted mirror. It is a simple, yet powerful addition that invigorates the bathroom's space.

01
2" Perimeter Frosting
Allows light to come forward towards the face, reducing overhead shadows that are typically cast from pot lights.

02
Light Technology
The lighting is composed of a very high quality LED Panel strip that is embedded right onto the surface of the mirror.

03
Finishes
Colour choices include a Matte White Body, Chrome Mirror Finish, Satin Brass, as well as a custom colour

FRONT-LIT MIRROR

BETA TABLE TOP

The Beta front-lit mirror brings its distinct oval shape to new levels . It can be custom-mounted onto almost any surface, lending its curvature to a wide variety of spaces. It is completely enclosed in a premium matte white body.

01
2" Perimeter Frosting
Allows light to come forward towards the face, reducing overhead shadows that are typically cast from pot lights.

02
Light Technology
The lighting is composed of a very high quality LED Panel strip that is embedded right onto the surface of the mirror.

03
Finishes
Colour choices include a Matte White Body, Chrome Mirror Finish, Satin Brass, as well as a custom colour

FRONT-LIT MIRROR

JEN

A Lumidesign classic, the Jen front-lit mirror is ideal for dressing up your powder room, while also providing optimal vanity lighting for make-up or grooming. The 2" perimeter frosting allows the light to come forward directly towards the face, cutting through overhead shadows that are typically cast from pot lights.

01
Closed Chassis Design
Allows light to come forward towards the face, reducing overhead shadows that are typically cast from pot lights.

02
Light Technology
Lighting composed of very high quality LED HO Flex Technology strip that is embedded directly on the actual surface of the mirror.

03
Finishes
The front-lit mirror itself is enclosed within a sleek and scratch resistant finish, matte white steel chassis.

CORE

FRONT-LIT MIRROR

ISABELL

As the Jen's edgier cousin, the Isabell front-lit mirror differs with its rounded corners that create smooth, continuous definition while maintaining a geometric aesthetic. The 2" perimeter frosting allows clear, frontal lighting to spread evenly to the face, reducing and cutting through overhead shadows that cast down from pot lights.

35

01

Closed Chassis Design

Allows light to come forward towards the face, reducing overhead shadows that are typically cast from pot lights.

02

Light Technology

Lighting composed of very high quality LED HO Flex Technology strip that is embedded directly on the actual surface of the mirror.

03

Finishes

The front-lit mirror itself is enclosed within a sleek and scratch resistant finish, matte white steel chassis.

CORE

FRONT-LIT MIRROR

AMY

The Amy front-lit mirror is defined by its dramatic strip of light. This provides any near-perfect powder room with a final touch — a minimalistic decorative lighted accent that elevates and completes any area. The mirror is designed for creating an ambient light atmosphere, and as such needs to be used with existing lighting.

37

01

Closed Chassis Design

Allows light to come forward towards the face, reducing overhead shadows that are typically cast from pot lights.

02

Light Technology

Lighting composed of very high quality LED hard strips that are embedded directly to the surface of the mirror.

03

Finishes

The front-lit mirror itself is enclosed within a sleek and scratch resistant finish, matte white steel chassis.

FRONT-LIT MIRROR

SUSAN

The Susan front-lit mirror is one of our most exclusive offerings. Over 8 hours of craftsmanship goes into carving its premium Starphire mirror glass with specialized processes including water jet cutting and hand polishing to smooth finished edges. The result is a bold, state-of-the-art piece that redefines the look a bathroom mirror.

01

Closed Chassis Design

Allows light to come forward towards the face, reducing overhead shadows that are typically cast from pot lights.

02

Light Technology

The lighting is composed of a very high quality LED Panel strip that is embedded right onto the surface of the mirror.

03

Finishes

The front-lit mirror itself is enclosed within a sleek and scratch resistant finish, matte white steel chassis.

AMBER CABINET

A cousin of the Amber, the Amber Cabinet front-lit mirror features a storage component that includes glass shelves, soft close hinges and a scratch resistant matte white finish. This lighted cabinet mirror is an exquisite yet functional piece, ideal for any bathroom.

01
Closed Chassis Design
Allows light to come forward towards the face, reducing overhead shadows that are typically cast from pot lights.

02
Shelving
10mm glass shelves with chrome hardware

03
Finishes
The front-lit mirror itself is enclosed within a sleek and scratch resistant finish, matte white steel chassis.

LASER ETCHED TV

ON

OFF

Etched mirror TV's are ideal pieces for bathrooms where clarity and reflection quality are essential for the guest. Using a 99% reflective silver mirror, we are able to laser-etch a portion of the glass out in order for an image or TV screen to be seen through the mirror.

Doing so will allow 99% of the quality as well as brightness from the TV image to appear through the glass while preserving the natural reflective quality of mirror's surface.

01

Finishes

The etched Mirror TV is enclosed within a sleek and scratch resistant finish, matte white steel chassis.

02

Screen Technology

Custom TV screen panels are specially constructed to bring the highest and brightest TV screen quality in the market.

03

Etched TV Spec

Etched mirror TV's are not vanishing, when it is turned off the black spot will remain in the mirror where the initial screen image was located.

CORE

MIRROR TV

VANISHING TV

ON

OFF

Vanishing mirror TV's are ideal for bathrooms that demand seamless TV images yet require a reflection quality that is comparable to a silver mirror. Lumidesign custom fabricates LED TV monitors that provide a true HD seamless experience in your bathroom. Lumidesign uses a 5mm silver toned two way glass that is custom coated to allow images to seamlessly appear in/out of the mirror.

45

01
Finishes
The vanishing Mirror TV is enclosed within a sleek and scratch resistant finish, matte white steel chassis.

02
Screen Technology
Custom TV screen panels are specially constructed to bring the highest and brightest TV screen quality in the market.

03
Mirror Quality
We use a Silver-Toned 2 way glass that is custom coated to allow images to seamlessly appear in and out of the mirror.

FRAMED VANISHING TV

ON

OFF

The framed vanishing mirror TV provides the perfect way to hide a television in your living room. We use German quality two way mirrors to achieve this effect allowing 95 % transmission of your HDTV. Lumidesign offers the complete framed mirror TV as well as just the framed mirror itself. Frames for vanishing TVs can also be customized with our selection of standard mouldings or from our preferred partners for frame mouldings.

01
Universal Mounting
Our framed TVs are specially designed for application on all types of surfaces within various settings and bathroom spaces.

02
Screen Technology
Custom TV screen panels are specially constructed to bring the highest and brightest TV screen quality in the market.

03
Frame Selection
Lumidesign offers a wide selection with hundreds of solid wood frames to choose from.

48 Components

Anatomy
Individual Parts
Glass Quality

Glass

Not all mirror and glass are the same quality. At a quick glance, mirrors imported from Asia seem to be the same quality but upon inspection you will find defects and low quality finishes.

Lumidesign uses a 5mm, 6mm or 8mm mirror that is manufactured in North America. Upon close inspection you will find the edging and finishing of the glass to be perfect, no chips or knicks.
